STEPS FOR IMPLEMENTATION

① Input → Company has advertisement video
→ Nike, .mp4
→ Samsung .mp4

② Video → Images in a frame.
→ frames are played in Time
→ FPS. → video

→ Speech → Text
→ Text → Transcription

Video = Image + Speech + Text

③ from the URL → Downloading the video to the Azure Blob storage.
→ https://xyz.com/pepsi.mp4
Raw data → azure blob storage — cloud.

④ Azure Video Indexer → Understand the video
→ Speech - Text
→ OCR → Text on screen
→ Transcript

⑤ Azure AI search → Embedding - VDB
→ Formally Ingest all the data → chunking, Embedding (Indexing process)
→ guidelines
→ Rules, regulatory policies

⑥ Q./A → GenAI → Retrieval checking

⑦ Azure App Insights
→ Post Production activity
→ Users Query, response.
→ Time for response
→ If any failure → why and what
→ Performance evaluation
